EXAMINER'S COMMENT

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 17, 2010 has been entered.

Response to Arguments

2. Applicant's arguments, see Remarks, filed August 17, 2010, with respect to the rejections of claims 1-4 and 18-20 under 35 U.S.C. 102 and claim 5 under 35 U.S.C. 103 have been fully considered and are persuasive. The rejections of claims 1-4 and 18-20 under 35 U.S.C. 102 and claim 5 under 35 U.S.C. 103 have been withdrawn.

Information Disclosure Statement

3. The information disclosure statement (IDS) submitted on August 17, 2010 was filed after the mailing date of the final action on February 19, 2010. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Allowed Claims

4. Claims 1-5 and 18-24 are allowed.

REASONS FOR ALLOWANCE

5. The following is an examiner's statement of reasons for allowance:
 - a. The applicant presented arguments sufficient to successfully overcome the rejection of independent claim 1. Specifically the applicant argues that Truitt does not disclose the step of measuring a natural flow rate of biological fluid because Truitt discloses pump 84 that pumps collected blood into the collection container 86 wherein the collection container with the collected blood therein is measured by scales. Since this collected volume was pumped into the collection container, the flow rate measured cannot be considered to be a measurement of a natural flow rate. While Truitt discloses a sensor for monitoring pressure in the line connecting the first chamber to the collection container through which the blood travels, that sensor is downstream from the pump and thus can only measure pumped flow rate. Truitt also does not fairly suggest the step of measuring such a natural flow rate as modifying the Truitt device and method to meet this limitation would require a destruction of the device that would render the device and method unsatisfactory for its intended purpose of pumping collected blood through the blood circuit for treatment. As Truitt is the closest prior art of record, claim 1 is now in condition for allowance. Claims 2-5 and 18-20 dependent directly or ultimately therefrom are also allowed.
 - b. Newly presented independent claim 21 also recites this step of measuring natural fluid flow rate of blood collected from a patient by natural flow without a pump that is not disclosed or suggested by Truitt and is thus also allowed. Claims 22-24 dependent therefrom are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
